

Kevin Handy's passion for architecture goes back to his high school days where he worked part-time drafting for local home builders.

While attending college, he spent his summers working for a local architectural firm, primarily on K-12 educational and state municipal projects, which continued on after he graduated from Illinois Institute of Technology.

Following seven years with that group, Kevin went on to work for another Springfield firm where he expanded his portfolio to include design-build structured projects, medical facilities, libraries, fire stations, and state buildings such as the Illinois State Supreme Court.

Today with G&H, Kevin is a Principal where he focuses much of his time and skill on medical projects, K-12 educational projects, and sustainable design for the firm's work, including other areas such as government, office, and worship facilities. His skill scope spans planning, design, construction documentation, and construction administration.

PROFESSIONAL DEGREE

- Illinois Institute of Technology, Chicago, Illinois / School of Architecture

REGISTRATION

- Licensed Architect / Illinois - License No. 001-016728
- Licensed Asbestos Project Designer Illinois
